

CR Surfacing Laboratories

Behavioural Optometrists

Established in 1976, CR Surfacing Laboratories has forged a reputation as Australia's premium optical laboratory. Our commitment to the success of independent practice and our continued investment in the latest technologies is a demonstration of that commitment. Our state-of-the-art laboratory is at the forefront of lens processing, offering the latest in online ordering (RX-Connect), Free-Form progressive technology.

CR Surfacing Laboratories has offices in Melbourne and Christchurch New Zealand and the appointment of Slama Optical Tasmania and Eingefasst Specialty Fitting in Western Australia as exclusive supply partners. These offices help strengthen our position in these key markets and with technical representatives covering all states and territories of Australia and the North and South islands of New Zealand, it will secure a strong, dependable line of supply for our independent practice partners.

With the passion to remain at the forefront of technology, CR Surfacing Laboratories continues to invest significantly in the latest in surfacing equipment. The installation of multiple fully automatic manufacturing lines with OptoTech and Satisloh digital surfacing machines and the MEI Bisphera XDD TBA fully automatic lens edging system, which is the most technically advanced lens edging system available anywhere in the world, will enable the production of the highest quality products within timeframes never seen before. With over 35 years experience we are well placed to meet any and all technical lens production your practice may require. There is no better time than the present to support a strong independent, privately owned and technically advanced Australian Lens Laboratory.
